

# Estancia Basin Regional Water Plan

November 2016

State of New Mexico  
Interstate Stream Commission  
Office of the State Engineer

## You Are Invited!

*The steering committee representatives for your water planning region are scheduled to present the updated Estancia Basin Regional Water Plan to the Interstate Stream Commission at its next meeting on November 17, 2016 at 10 a.m. at the State Capitol Building, Room 321, located at 411 S. Capitol Street in Santa Fe.*

## Estancia Basin Regional Water Plan Presentation to the Interstate Stream Commission November 17, 2016

*You are welcome to attend to learn about the suggested updates for your region.*

***New Mexico State Capitol Building, Room 321  
411 S. Capitol Street, Santa Fe, NM 87501***

Your region's overall water supply comes almost completely from groundwater, with only 0.1% coming from surface water. Because the groundwater supply is diminishing, your region's Steering Committee is focused on understanding the limits of this resource and planning for future reductions in pumping capacity.

Under a severe drought, the region's water supply could be only 57% of what it is today by the year 2060.

Your Steering Committee developed numerous strategies to address water issues in your region including improved water system infrastructure, water conservation, irrigation system upgrades and watershed restoration projects.

Come learn what the Steering Committee has planned to address the shortages.
